Introduction

Thank you for choosing to use our software.

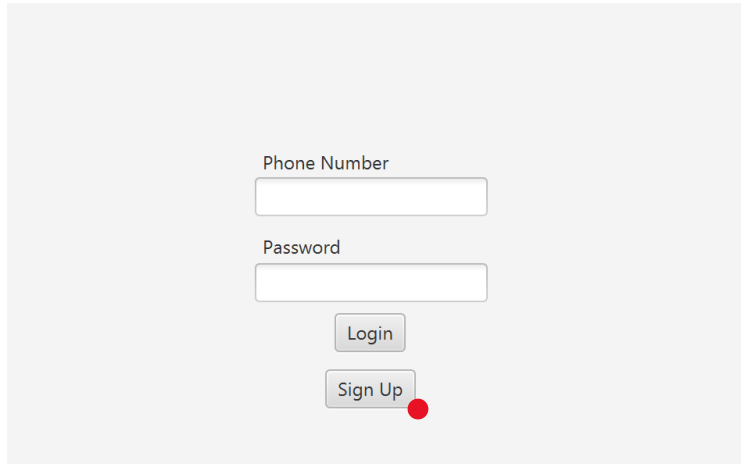

This is a simple yet powerful software to manage restaurant and handle food order. While designing the software we had ease of use on our mind. Despite the simplicity of the software it is still recommended to read this document before using the program to get the best experience out of it. This user guide only contains the steps for the Views which has 100% functionality.

This software was created by students from VIA university colleges thus if you find any bug, please contact us on GitHub.

Create an account

If you don't have an account than you need to create an account before using this software. When you first open the software, you will be prompt with the login view.
